

Project Specification: Inam Motors Management System

Prepared for: Inam Motors

Prepared by: Yousha

Date: February 12, 2026

1. Executive Summary

Development of a customized Desktop Application to manage the complete lifecycle of car buying, selling, inventory management, and financial tracking for Inam Motors. The system focuses on installment management, document tracking, and investor transparency.

2. Functional Modules

Module A: Inventory & Vehicle Management

- **Comprehensive Car Profile:** Recording of Make, Model, Year, Color, Chassis Number, and Engine Number.
- **Multi-Image Gallery:** Ability to upload and view multiple high-quality images for every single car in the inventory.
- **Vehicle-Specific Expense Tracking:**
 - Track expenses incurred *specifically* on a car (e.g., "Denting/Painting for Honda Civic XYZ").
 - These expenses will automatically deduct from the final profit of that specific car.
- **Document & Asset Tracking:**
 - **Car File Status:** Checkbox/Status to track if the file is "In Office," "Given to Customer," or "With Excise."
 - **Number Plate:** Log whether the number plate is received or pending.
- **Marketing PDF Generation:** One-click generation of a professional PDF "Car Data Sheet" (with photos and specs) to share with potential buyers via WhatsApp/Email.

Module B: Sales & Customer Management

- **Customer Profiling:** Storage of Full Name, Phone Number, CNIC (ID Card), and Address.
- **Dual-Copy Invoice Generation:**
 - System generates two identical invoice copies on one page (or separate pages):
 1. **Customer Copy**
 2. **Office Copy** (for signature and filing).
- **Sale Types:** Support for both "Cash Sale" and "Installment/Credit Sale."

Module C: Payments & Installment Engine

- **Partial Payment Logic:**
 - Ability to record a "Down Payment" or "Token" date and amount.
 - System automatically calculates the "Remaining Balance."
- **Installment Management:**
 - Define a payment schedule (e.g., "Remaining 5 Lakhs to be paid on 15th March").
 - **Payment Modes:** Record method of payment (Cash, Online Transfer, Cheque) along with Account Number/Transaction ID.
- **Automated Reminders:**
 - **System Alerts:** Dashboard notification when a customer's payment date is near.
 - **WhatsApp Integration:** Auto-generate a polite WhatsApp message to remind the customer of their upcoming due date.

Module D: Financial & Investor Dashboard

- **Investor Transparency:**
 - Track which investor's cash was used to purchase which car.

- Calculate profit split per car based on investor contribution.
 - **Profit & Loss Reporting:**
 - Automated calculation: *(Sale Price - Purchase Price - Vehicle Repairs - Office Expenses) = Net Profit.*
 - **General Expense Manager:** Tracking of daily showroom operational costs (Tea, Electricity, Rent, Staff Salaries).
-

3. Technical Deliverables

- **Platform:** Windows Desktop Application (Offline/Local Database).
- **Database:** Secure, encrypted local storage (SQLite).
- **Backup:** One-click database backup feature to prevent data loss.
